

# CENTERLINE WIRING HARNESS QUESTIONNAIRE

Alfa Romeo made numerous running changes to the Giulietta/101 Giulia series which do not conform to year breaks. In order to make sure our harness fits your car as closely as possible, please answer these questions and fax back to Centerline. If you wish to have modifications made to the harness, make note of that as well.

There are four styles of wire ends used on 750/101 cars; Bullet connector, Flat or Eyelet connector, or no connector with the wire held in place with a set screw. Circle the appropriate answer for each line. Please make any additional notes on a separate page.

**Year and Model of Alfa, Veloce or Normale:**

**Vinyl or Cloth wrapped wire:**

**CONNECTOR STYLE:**

					Set	Bullet	Flat	Eyelet
